

PPG Envirobase® High Performance “Convert with Confidence” Waterborne Technologies

This 1 day program is designed for the collision center technician who currently uses PPG products in their refinish operations. Technicians will be given the product information and hands-on experience needed to convert their process over to spraying Envirobase HP. It includes information about PPG’s “Convert with Confidence” process and what to expect before, during and after the shop is converted. Hands-on exercises are designed to provide product exposure to the painter so the change to spraying water is successful.

Who should attend?	PPG certified collision center technicians.
Course Objectives:	To introduce collision center technicians who are currently spraying PPG solvent borne basecoats to the Envirobase HP waterborne basecoat system.
Course Length:	1 day
Class Size:	8 - 12 students.
Topics Covered:	<ul style="list-style-type: none">• Shop and product safety.• Environmental rule update.• Equipment requirements.• Product line.• 2K Undercoats & Sealers.• Waterborne basecoat system.• Clearcoat systems.• Color tools.• Troubleshooting.• Application procedures:<ul style="list-style-type: none">- Proper application practices.- Spot repair and blending.- Equipment clean-up.
