Date: March 2012

D747 Cyanine Blue – Limited Use Toner

Product Information:

- A number of OEMs have started to use advanced pigmentation to create cleaner, more intense colors.
- D747 Cyanine Blue is made from a highly chromatic, red-shade phthalocyanine blue pigment with a neutral flop.
- The special color effects OEMs have been able to achieve using this pigment is difficult to match accurately in refinish product lines which do not contain the pigment.
- The OEMs are expected to continue to produce colors containing advanced pigments of this type in the future.
- D747 Cyanine Blue has been designated a “Limited Use Toner”.
- D747 Cyanine Blue needs to be stirred like any other Global toner and requires a position on the mixing machine.

Color Information:

- For the launch, the following colors have been matched:

OEM/Motor Manufacturer	OEM Code	OEM Description	First Year	Last Year	Variant	PPG Code
KIA	H5	Java Brown	2009		Prime	923484
