

Matthews Paint Intermix System

Features and Benefits

- 16 base colors.
- 6 additional toners to intermix metallic colors.
- Over 65,000 custom colors can be matched to your specifications.
- Color formulas on CD-ROM.
- System available in satin and gloss, conventional or VOC compliant toner bases.
- Formulas available from 189 color systems including the Pantone color systems and 3M Vinyl.
- Convenient and labor saving when installed in your shop.
- Reduces inventory and removes the cost of storing unused paint.
- Mix the precise volume of paint required for your project, when you want it, right in your own shop.

Easy to Ship

The height of the shipping carton of one shelf is no more than 8.5cm (3.5") and the station dimensions are 87" H, 17 1/2" D, and 67" W.

Easy to Assemble

No tools required. Easy assembly due to the tube construction and patented twist and lock system.

Easy to Maintain

The machines have non-stretching steel reinforced belts and few parts. Removing the motor or a belt does not require machine disassembly.

Modular and Versatile

Gallon shelves can be positioned wherever needed. Reconfiguring the machine is easily done at any time. Easily upgradable by simply adding or removing shelves at any time.

Direct Drive

Eliminates motor belts and pulleys. Fewer moving parts, less wear, less noise.

Simplicity

Only 5 moving parts per shelf.

Quiet

Quiet operation is the result of the direct drive system and fewer moving parts.

Safety

No possible contact with any moving part. CE, UL, CSA approved.

Quality

The research and technology has been approved by the engineering department of an ISO 9001 approved company.

Appearance

The appearance of the machine is unique and appealing.

Sealed Shelves

Eliminates contamination from paint and dust.
