

PPG Training Course Description and Objectives

Course Name: Delfleet Spot Repair and Color Tinting
Course Code: PPG720

Course Description:

The first day of this course covers the products and procedures necessary to perform spot repairs with the Delfleet paint line. The second day of the course covers color tinting theory and technique.

Who Should Attend:

All fleet technicians performing paint repairs with Delfleet. Technicians should have a working knowledge of the Delfleet Evolution product line prior to attending this course.

Length: 2 Days

Class Size: 8 person limit

Cost: \$225

Topics Covered:

- Safety
- Delfleet color tools (mixing toner wall chart, color and variant selectors, color lookup via computer)
- Basecoat and Single Stage solid color blending techniques
- Basecoat and Single Stage metallic color blending techniques
- Basic color theory
- How to plot colors
- How to use the Delfleet mixing toner color chart to tint colors

Hands-on Exercises (50-60% of class)

- Several basecoat and single stage color blending repairs with solid and metallic colors
- Tinting 3-5 solid and metallic colors
