PaintManager™

PaintManager® Software Essentials I, including the RapidMatch™ X-5 program software

Class Description

This instructor-led course covers the absolute essentials of the PaintManager® program software for mixing and managing the paint operation features and benefits including the basic operation of the RapidMatch™ X-5 Spectrophotometer color tool.

Class length is one day (8 contact hours). Each participant will use a supplied laptop computer during the class.

All PPG distributors that use the PaintManager® program software should attend this training to master the essential features as well as the basic operational features and functions of the RapidMatch™ X-5 Spectrophotometer. This training also builds a knowledge foundation for the more advanced features and to provide outstanding support to PaintManager® software customers.

Class content and learning objectives

Class participants will be able to:

- Understand and perform hardware and software installation steps
- Understand and perform all software setup and configuration functions
- Perform color formula lookups of all types
- Calibrate and Reset the RapidMatch™ X-5 instrument
- Properly use the RapidMatch™ X-5 instrument to take and download color readings
- Search for formulas using OEM and Wildcard methods
- Understand and reference the instrument documentation
- Use the "compare" and "adjust" formula features
